COMPANY PROFILE

Who we are

SUN BUILDING PRODUCTS is a Partnership firm having its inception in 2016. It is duly registered under the Commercial Taxes Department of Tamilnadu and Tamilnadu Value Added Tax Act 2006 to follow proper rules and regulations. The key person **C.Baskaran** B.E has more than 25 years of experience in marketing, sales and manufacturing portfolios. He relieved himself from the position of the General Manager from a leading and renowned uPVC manufacturer, to start this venture. Similarly the management team is also experienced and eminent in relevant areas.

What we do

We deal with mainly **uPVC windows profiles**, UPVC windows and hardwares. Not limited to uPVC items and materials we also deal with **LED Lights, Furniture Items, Glass** and **Interior & Hardwares** Items. We can be your one point suppliers for factories and office interiors.

Our Policy

We supply the full range of uPVC profiles directly to many uPVC windows and doors manufacturers. We stick to our policy of only supplying the raw materials and do not manufacture uPVC windows and doors. Even we pass on any finished products enquiries to our clients.

The Product

The un-plasticized poly vinyl chlorid's abbreviation is uPVC . The uPVC products look elegant yet sturdy. These products are environmental friendly as no wood or such materials are used in the manufacturing process. The products are much stronger than the traditional wooden windows. The maintenance needed for the uPVC products are very minimal. They never bend like wood due to the change in climatic conditions. Hence the original shapes are always intact.
